

ANESTHETIC AUTHORIZATION

A pre-anesthetic blood test can detect abnormalities in the liver and kidneys that aren't apparent on a physical exam. This helps minimize the risk associated with anesthetic procedures. A **blood test is mandatory for patients over 8 years** old and optional for all others. If you have any further questions, please indicate where you'd like the doctor to call you.

Yes **No** If your pet is under 8 years, would you like a pre-anesthetic blood test? There will be an added cost of \$53.50

I authorize performance of the following procedures, administration of anesthetics, and any other services deemed necessary for the health and safety of my pet while at the Animal Clinic. The nature and risks of such services have been described to my satisfaction and I realize that neither guarantee nor warranty can be made regarding the results or cure. I also understand full payment is due at the time of service and I assume financial responsibility.
